WORK EXPERIENCE

University of Cebu Lapu-Lapu and Mandaue – Senior High School Department — Mandaue City, Cebu
Robotics Working Scholar — *2024 – 2026*

- Assist in facilitating robotics instruction and hands-on laboratory activities for senior high school students.
- Manage the setup, testing, and troubleshooting of (87) robotics kits (29 Arduino kits, 29 Raspberry Pi kits, and 29 Lego EV3) for student projects.

PROJECTS

BUDGEE - Offline Student Budgeting App (Android Mobile app) 2026

- Developed an Android budgeting application using React Native, Expo, and SQLite to record expenses and manage savings goals.
- Implemented offline expense tracking and budget visualization based on the 50/30/20 budgeting rule. (PREVIEW - https://expensetracker-aebriam.vercel.app/)

SHUTTLEFLOW - Badminton Queue Management App (Android Mobile app) 2026

- Built a badminton queue management application with player check-ins, skill-based matchmaking, and court timers.
- Implemented player waiting-time and win/loss tracking to support organized open-play sessions. (PREVIEW - https://sports-queue-delta.vercel.app)
